# GLOBAL SHIFT

MAPPING THE CHANGING CONTOURS OF  
THE WORLD ECONOMY

PETER DICKEN

"Not just recommended but essential"

5TH EDITION

**This new edition of *Global Shift* provides a completely up-to-date map of the global economy. It presents a detailed and dynamic account of how the global economy is being transformed by interactions between transnational corporations, states and interest groups. These interactions are explained in the context of rapidly changing technology, in which digital technologies are becoming increasingly dominant.**

**Features of fifth edition:**

- every chapter has been revised to take account of new empirical developments and to incorporate new ideas on production, distribution and consumption
- an expanded discussion of the role of global civil society, governance, and alternative economic systems
- case studies updated, with a new chapter on the agro-food industries
- all of the empirical data have been fully updated
- all of the illustrations have been drawn or redrawn for this edition
